ABRA Travels

Your Journey, Our Commitment

Enterprise Transportation & Fleet Operations Platform

A centralized solution for organization-managed transportation operations

BUSINESS PURPOSE AND VISION

- The Abra Travels Fleet Management Application is designed for organization-managed transportation operations. It provides complete centralized control, full operational visibility, and reliable execution of daily fleet activities across the entire enterprise.

Centralized Control

Single platform for managing all fleet operations and transportation requirements

Operational Visibility

Real-time tracking and comprehensive reporting for informed decision-making

Enterprise Ready

Secure, scalable architecture designed for consistent organizational use

SYSTEM OVERVIEW

- Abra Travels is a unified fleet operations platform that integrates web and mobile applications to support coordinated transportation management.

Client Organization

Manages transportation policies, employees, and operational requirements

Operations Admin

Plans routes, schedules trips, monitors execution, and manages exceptions

Driver

Receives assignments, executes trips, and shares location updates

Customer

Employee passengers track trips and receive service notifications

OPERATIONAL SYSTEM AND WORKFLOW

- The platform follows a coordinated end-to-end workflow that connects all stakeholders in the transportation process.

1. **Organization Requirements**
   Client organizations define transportation needs, employee rosters, and service level requirements
2. **Route Planning**
   Operations administrators plan vehicle routes, schedule trips, and assign resources
3. **Driver Execution**
   Drivers receive trip assignments via mobile application, execute routes, and update status
4. **Customer Tracking**
   Employee passengers receive notifications and track vehicle locations in real time
5. **Reporting & Analytics**
   System captures trip data, generates operational reports, and provides usage insights

CLIENT (ORGANIZATION) WEB APPLICATION

- The Client Portal enables organizations to configure and oversee their entire transportation operation from a centralized web interface.

Employee Configuration

Manage employee profiles, shift schedules, and transportation entitlements

Route & Shift Planning

Define routes, configure shifts, and establish service parameters

Live Trip Visibility

Monitor active trips, vehicle locations, and service delivery status

Operational Reports

Access detailed reports on usage, compliance, and operational performance

ADMIN WEB APPLICATION

- The Admin Dashboard serves as the operational nerve center, providing administrators with complete control over daily fleet operations and resource management.

Vehicle Management

Track vehicle assignments, maintenance schedules, and capacity utilization

Driver Management

Assign trips, monitor driver performance, and manage credentials

Trip Scheduling

Plan and coordinate trip assignments across routes and time periods

Live Monitoring

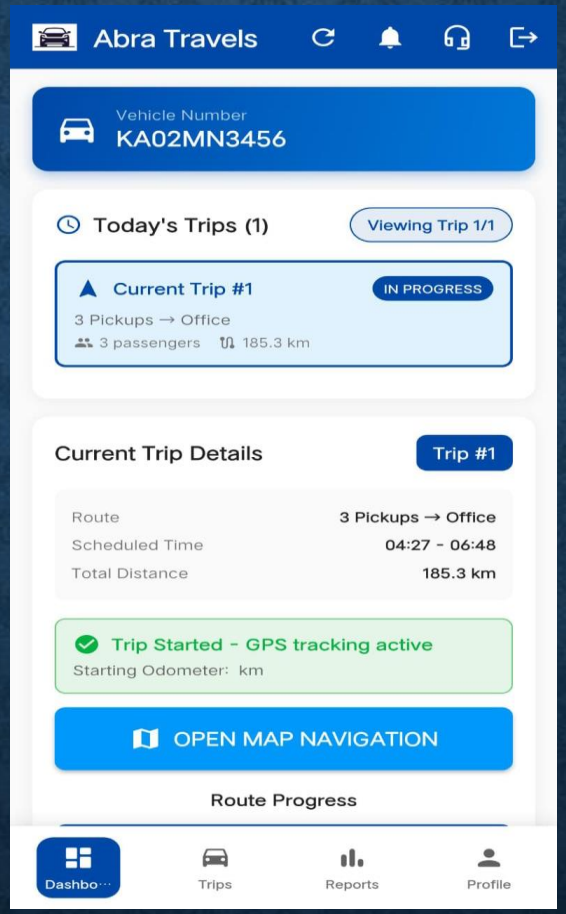
Track active trips and respond to operational exceptions

Reporting

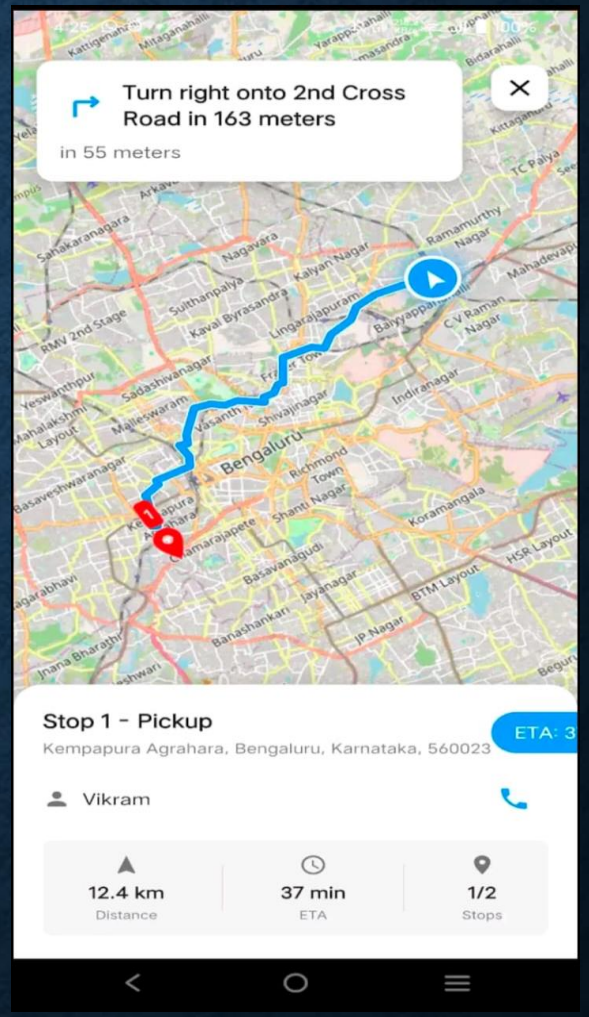
Generate operational reports and compliance documentation

DRIVER MOBILE APPLICATIONS

- View assigned trips with route details and schedules
- Start and end trips to update operational status
- Share live location updates during trip execution
- Receive notifications for schedule changes or exceptions

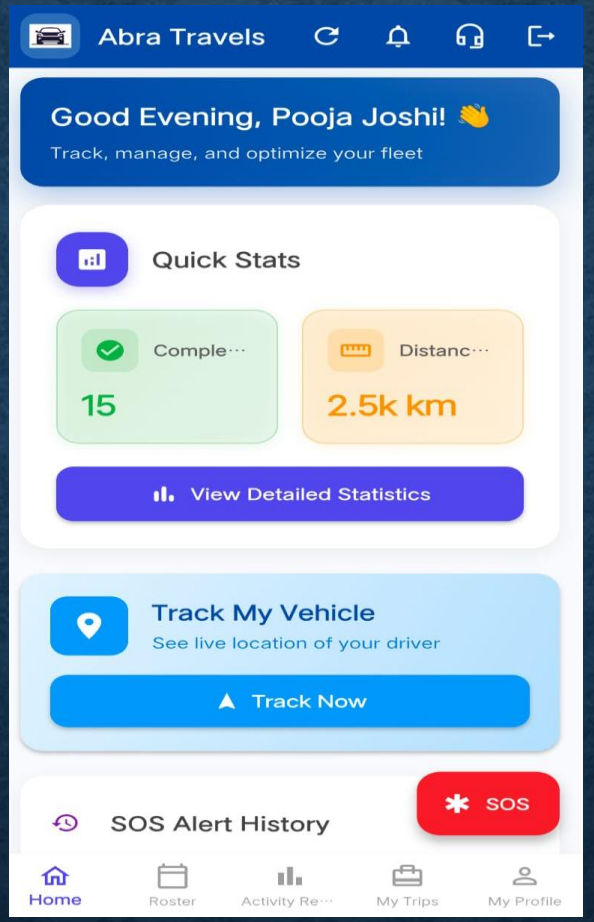


Driver Dashboard

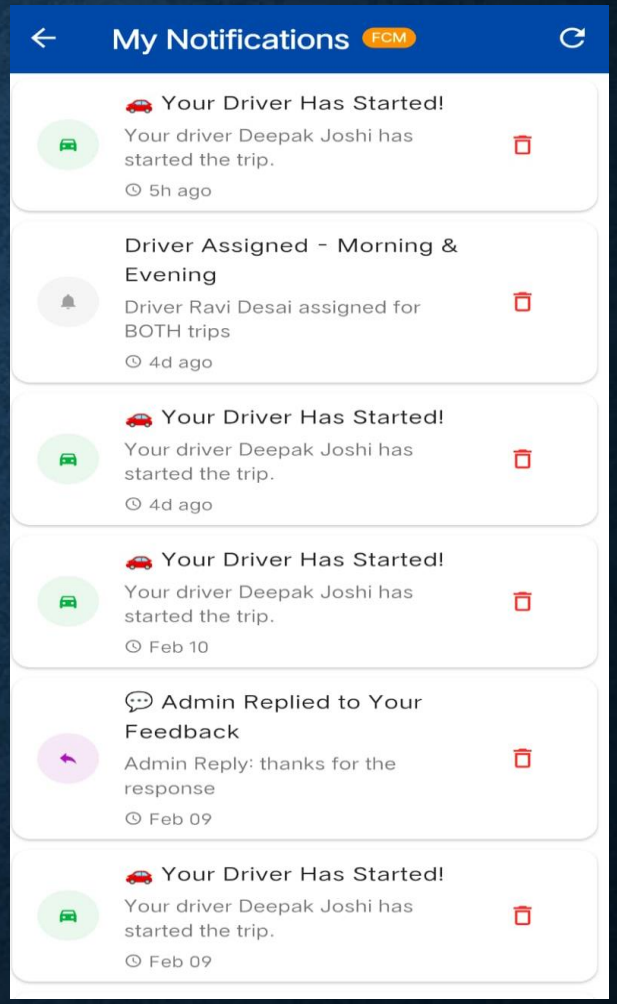


CUSTOMER MOBILE APPLICATION

- View pickup and drop location details for scheduled trips
- Track vehicles in real time with estimated arrival times
- Receive notifications for trip status updates and changes
- Provide feedback on trip service quality and experience



Customer Dashboard



CONCLUSION

- The Abra Travels Fleet Management Application is a centralized platform for enterprise transportation operations.
- A unified web and mobile system ensures control, visibility, and reliable execution.
- Built for scalability, consistency, and transparent operations.
- Inspired by the values of "Mr. Ratan Tata" — *"When operations are centralized and transparent, trust becomes a natural outcome."*
